PROFESSIONAL SUMMARY

Bachelor Software Engineer seeking a position in the field as an entry to mid level developer. I emphasize on Website Development, Application Development, and Python Programming but I value my general skill as a Software Engineer above all else.

SKILLS

- Python, Javascript, Swift, Java, HTML5/CSS
- MySQL, MongoDB, PostgreSQL
- React.js, Node/Next.js, Digital Ocean, Bootstrap
- Github, Git, Bash, VS Code, Sublime text, XCode
- Mac, Windows, Linux, Leadership, Communication

INTERESTS

- Learning
- Trading stocks (Crypto, Regular)
- Animated television (American Dad, Family Guy, Etc)
- Gaming on Xbox, PC, Mobile
- Discord Space, currently a server owner used mainly for communication and trading.

EDUCATION

B.SE. COMPUTER SCIENCE — 2017 - 2021

SOUTHERN NEW HAMPSHIRE UNIVERSITY - MANCHESTER, NH

I graduated Magna Cum Laude in Computer Science with a concentration in Software Engineering in July 2021. I have grown immensely, not only as a Computer Science professional but as a person.

HIGH SCHOOL DIPLOMA — 2012 - 2016

SMYRNA HIGH SCHOOL - SMYRNA, DE

I graduated from Smyrna High School in June 2016. I held a 3.6 GPA and during my time in High School I've taken AP Statistics, AP U.S. History, and a college English course called E110 where I accrued college credits.

PROJECTS

FARMERS' MARKET NFT — SEPT 2021 — MAY 2022

I developed a fully responsive react website to launch the Farmers' Market NFT, with impressive visuals and artwork that I generated myself. Website can be found at www.Farmersmarketnft.com.

Major accomplishments:

- Creating a responsive react website filled with sections, modals, and animations.
- Working in tandem with two other professionals in art and marketing, while also increasing the visibility of our project.

PERSONAL PORTFOLIO — 2020-2022 CONTANT DEVELOPMENT

I created a personal portfolio with Django, Python, PostgreSQL, and Digital Ocean to host it. After doing so I reversed engineered this portfolio into a static Github Pages website that I work on as needed. This website can be found at www.Jaredspersonalportfolio.com.

Major accomplishments:

- Building the Django website with a thorough backend to log into as admin and create posts/projects.
- Reverse Engineering the website I was paying monthly for to a static Github Pages site for free especially as backend was not needed.

UNREAL ENGINE ESCAPE GAME — APR 2021 — JUNE 2021

I led a team of 5 Bachelors all with separate roles to create an Escape Game in Unreal Engine 4. This game features the player/user attempting to escape 5 different rooms with traps, enemies, and an ending boss to complete the game.

Major accomplishments:

- Taking the role of Team Lead due to my level of experience in programming and my knowledge in version control with Git/Bitbucket.
- Communicating at a high level with the rest of my team for 8 weeks, helping to solve their problems in Unreal Engine or in source control, and handling all merge conflicts personally.
