Seeking position in: **Software Development**

I'm a Junior developer with an emphasis on Python/Django based web-applications. I'm currently a Sophomore in Southern New Hampshire University with a heavy passion towards programming, I love learning more and more about the business and development every day and work well with any situation. I'm currently working on a few personal projects including the Django based portfolio website I've been building.

Technical Skills:

Languages: Python, Java, Javascript, HTML w/ Bootstrap, CSS w/ Bootstrap, SQL

Frameworks: Django

Tools: Visual Studio, Sublime Text, MySQL, GitHub, Bash, Postgres

Additional Experience: Windows, Mac, Linux, Database Migrations, Database Management

---

Professional Experience:

Union Carpenter Local 173, DE | May 2017 - August 2017
Worked as an apprentice carpenter under the Vice-President of the Union while doing so I learned valuable communication skills and how to see things from different perspectives, work very diligently until the task is done regardless of "end of day" time, and used mathematics to ensure my works quality.

Amazon Warehouse, DE | November 2015/6 - February 2016/7
I worked peak season 60 hour weeks (5 12's) both in 2015 and 2016, while doing so I learned that the customer is the main priority no matter what, I also learned working long hours and doing so with quality work, and how timeliness effects the cost coming from the employer/company.

Education:

Southern New Hampshire University, NH | August 2017 - Present
I'm currently a Sophomore at SNHU going for my bachelor's degree in Computer Science w/ concentration in Software Engineering, I'm currently holding a 3.9 GPA.

Smyrna High School, DE | August 2012 - May 2016
I graduated from Smyrna High School with a 3.6 GPA holding honors in most of my classes, during my time in

High School I've taken AP Statistics, AP U.S. History, and a college English course called E110, I passed all of these classes with a B above average however I qualified for college credits in E110.

Certifications:

- Test-Out PC Pro certification: Date achieved - March 2018

Personal Projects:

- Personal Portfolio Website – Constantly adding and building new things to add on to the ever-growing website.
